# R-AQUA

# Coding plugs type COD

R-AQUA's CGW range of air/water heat pumps are suited for heating and cooling as a standard.
In certain cases, it is necessary to permanently disable the cooling function to qualify for a premium. The purchase and installation of the coding plug (heating only) permanently disables the cooling function on the unit.

## Brand

- R-AQUA

## Application

- Permanent deactivation of the cooling function

## Installation

1. Turn off the power supply to the heat pump.
2. Remove the blue coding plug from the circuit board.
3. Insert the heating-only coding plug into the unit.
4. Turn power back on to the heat pump.
5. The unit is now operable in heating only mode.
